Ornato Hybrid
Waterproof Floor

Ornato Hybrid Waterproof Floor

Ornato hybrid waterproof flooring is specifically designed to have a great look and a genuine feel akin to a real timber floor. It takes the tone of a luxury vinyl that is well covered to give the planks a rustic appearance.

The uniqueness and appeal is due to the different knots and grains on the surface that are not only visual representation of real timber but a tactile one.

Ornato hybrid waterproof flooring which utilises an advanced modular plank technology, offers a stylish and practical flooring solution for any office or home. The Ornato Hybrid range is extensive in designs which encompass all the pros of a genuine timber article whilst requiring less maintenance. The Ornato Hybrid flooring product range has high stability, is hygienic, quiet, slip resistant and easy to repair and clean.

Coastal Blackbutt

If you are looking for a floor that is easy to install, then you should opt to use the Ornato hybrid waterproof floor.

With this new generation of hybrid flooring, the 5G click system keeps the floors in place, hence reducing the need for the adhesive in most spaces. The floor is 100% waterproof consisting of a multi-layer rigid core board construction, enabling a larger area to be laid without the essence for expansion trims. In addition to that, the floor has the added advantage of helping to hide imperfections which are usually found in sub-floors.

Ornato hybrid waterproof is an overlay flooring system since it can be installed in all types of surfaces such as timber floors, tiles, plywood and concrete as long as the floor is clean, level, smooth and dry and have no large cracks.

It is one of the few floors that only requires minimal care and maintenance, because it is made up of 0.55mm UV wear layers. If you follow the appropriate ways of maintenance, you will certainly increase the longevity of your floor.

Why Ornato Hybrid Waterproof Floor?

The following are all the benefits of Ornato Design Flooring.

- 100% waterproof - the floor is manufactured using a multi-layer rigid core board construction material
